## **FOR IMMEDIATE RELEASE**

### **Keane Business Risk Management Solutions Releases SCORE 3.75**

*Updates to firm's GRC software include enhanced Sarbanes Oxley reporting, data analysis, audit management dashboard and automated attestation*

Wayne, PA – March 31, 2009 – [The Keane Organization](#)'s Business Risk Management Solutions ([BRMS](#)) division recently unveiled its latest updates to its compliance and risk process management software as a service product, SCORE. [Keane SCORE™](#) is a patent-pending integrated risk and compliance management tool. SCORE collaboratively automates and interlinks the three key processes common to enterprise-wide [governance, risk and compliance \(GRC\) management](#): Measure, Manage and Monitor.

Keane SCORE 3.75 is deployed in insurance, financial services, and various operational environments to both streamline regulatory compliance and automate enterprise-wide GRC activities including Internal Audit. While SCORE-based applications are predominantly deployed for regulatory requirements solutions stemming from the United States' Securities and Exchange Commission (SEC) and the United Kingdom's Financial Services Authority (FSA), the application is easily configured to address specific compliance and/or risk management needs across a range of industry verticals.

## Keane BRMS – SCORE 3.75

The newly launched version, SCORE 3.75, has increased functionality including enhanced Sarbanes Oxley reporting and automated attestation, and internal audit interface linked directly to the attestation process. In addition, SCORE 3.75 now offers users risk and control mapping analytics, dynamic document and policy distribution and validation, audit management dashboards and enhanced real-time assessment scoring and automated interactivity with risk profiling.

“Our most recent version of SCORE illustrates one of the primary benefits of our SaaS – flexibility,” said [Peter Teuten](#), President of Keane BRMS and the software’s chief architect. “Organizations are finding that today’s heightened audit and regulatory environment requires more detailed attention to their GRC. SCORE offers them not only a window into their company’s risk management and compliance, but gives them the tools to effectively manage the associated processes, enhance transparency, and automate reporting. By offering a comprehensive and customizable solution, SCORE allows organizations to measure, manage and monitor their risk management and compliance processes, regardless of the industry.”

### **About The Keane Organization**

The Keane Organization provides compliance and risk management solutions that help companies mitigate regulatory, operational and financial threats across the enterprise. Keane’s solutions allow business leaders to measure, manage and monitor these threats in a way that produces measurable return on investment. Whether it involves regulators, investors, customer, employees or vendors, Keane’s proprietary business methodology allows clients to systematically identify risk, create specific action plans, and establish accountability for results.
