FOR IMMEDIATE RELEASE

**StockTrans chooses Keane Business Risk Management Solutions' SCORE platform
to measure, manage and monitor their SAS70 Controls**

*Keane SCORE goes "Beyond Compliance" to audit, document and prove compliance in
real-time*

Wayne, PA—June 21, 2007—Today **Keane Business Risk Management Solutions** announced that StockTrans, an industry leading stock transfer agent, stock benefit plan administrator, and stock plan administration software provider, with headquarters in the Philadelphia suburb of Ardmore, PA, has selected Keane SCORE to take them one step further than the standard, annual SAS70. By implementing SCORE, the company will be able to deliver up-to-the minute reports on all aspects of its compliance practices and controls at any time and from anywhere.

SCORE is a patent-pending, web-based solution that automates and streamlines a number of key functions required to accomplish and maintain compliance in a collaborative and transparent environment. The three key components of Enterprise Risk and Compliance Management – Measurement, Management, Monitoring – are fully supported and the tool

is completely flexible and customizable to meet any customer's needs in terms of scalability, business rules, terminology and user access controls

The Statement on Auditing Standards No. 70 (SAS70) is a widely implemented auditing standard of the American Institute of Certified Public Accountants. It requires a service organization to go through an independent audit of controls and safeguards for hosting customer data. In 2002, Sarbanes-Oxley made SAS70 important for certifying the effectiveness of internal controls over financial reporting.

“An annual SAS70 certification is just that – a point-in-time picture of compliance,” says Jonathan Miller, President of StockTrans. “But with Keane’s SCORE tool, we will take our compliance obligations to a higher level and be able to demonstrate to our clients the state of our controls at *any* time. And as requirements change, we can quickly incorporate them into our business processes because the tool can be easily updated with the latest rule.”

ABOUT STOCK TRANS

Since 1972, StockTrans, Inc. has been leading the stock transfer industry in technology, and professional service. Our clients cover the entire spectrum of public and private enterprise and are located across the United States and around the globe. Hundreds of companies, and hundreds of thousands of their shareholders, have counted on us to provide rapid informational response, administer dividend and employee stock purchase plans, deliver complete annual meeting services, and handle billions of dollars in corporate actions. StockTrans, through its affiliate, Plan Management Corp., has been administering stock option, restricted stock, performance-based and other plans since 1997. As administrators, we have designed and implemented the most comprehensive and easiest-to-use web-based plan administration software available-OptionTrax®- for both public and private companies that wish to maintain their own plans in-house. OptionTrax® is FAS 123R compliant and includes proprietary anti-backdating features.
